Do you know someone that might be interested? We will pay $500,000 CLP for the first referral that gets hired.

Job Description
ZeroFOX seeks a web developer, software engineer or cloud architect driven to create web-based software solutions that aggregate and analyze different data sources. You’ll join a team of software engineers, data scientists, and security experts who are disrupting the cyber security industry and protecting organizations from social media risk. ZeroFOX engineers are at the forefront of one of the most rapidly growing industries in the world. We are interacting with social networks at an unprecedented scale, requiring us to overcome novel design challenges and architectural hurdles.

ZeroFOX engineers thrive in a fast-paced, rapidly growing environment and are eager to design and build cutting-edge products and technology. They push each other to find the best technical solutions. Learning is a huge part of the ZeroFOX engineering culture. Whether it’s through Lunch & Learns, giving demos on new and exciting technologies, or attending local developer meetups together, ZeroFOX engineers always look for ways to enhance their skill sets and our product.

Responsibilities
- Develop components of our core SaaS platform written in Python, Django, Javascript, Node, Angular, and Go.
- Build tools to extract data from a growing list of social networks including Facebook, Twitter, LinkedIn, YouTube and Google Plus using their Application Programming Interfaces (APIs) and open source libraries.
- Contribute to an API toolkit built with the Django REST framework that is used on a daily basis by an expanding customer base.
- Write queries that filter, aggregate and find data within relational (like MySQL) and NoSQL databases, as well as leading high performance key/value stores.
- Write unit tests that will automatically ensure the integrity of our software within Jenkins.
- Solve problems by either writing solutions from scratch or by using open source projects.
- Contribute to and help shape the culture of the ZeroFOX engineering department.

Qualifications
- Exposure to an Agile software development process as either a Scrum team lead or team member.
- Clear, concise, thoughtful communication skills (in English) are a must have.
- Comfort working and designing RESTful API services.
- Understanding of source control branching models like Git-Flow to contribute effectively within our software release schedule.
- An eye for new and exciting libraries/technologies and willingness to shout about them to the rest of the team.
- Ability to work effectively within a geographically dispersed team.
- Experience with task queuing frameworks, such as AWS SQS, is a plus.
- Nerf gun shooting skills are a plus.

**Education / Experience**
- Bachelors or Masters in Computer Science or equivalent experience.

**Do you want to actually like where you work?**
- **Amazing Product:** ZeroFOX is creating paradigm shifting cyber security product.
- **Bragging Rights:** Recently named the Tech Company of the Year by the Tech Council of Maryland, ZeroFOX is a highly decorated company that is recognized as leading the next generation of predictive cyber solutions.
- **Awesome Culture:** ZeroFOX is a community – most describe our team as a group of close knit, incredibly talented, and highly caffeinated people. All are encouraged and required to incorporate innovative ideas and prototypes into our product. Suggestions around streamlining communication, development practices and operations are welcomed.
- **Get Things Done:** Innovation is woven into the fabric of our organization. Every aspect of our operations is purposeful; enabling us to research, develop and innovate faster than the competition.
- **Benefits:** Competitive compensation and benefits package available.
